Deli Serdang, Sumatera Utara

PROFILE

Fresh Graduate in Information Systems with a strong interest and focus in Data Engineering. Experienced in building end-to-end ETL pipelines, data integration, and data streaming workflows across Data Lake and Data Warehouse projects. Worked with modern data stack tools to process, transform, and orchestrate both batch and real-time data pipelines. Successfully developed analytics-ready datasets to support reporting and data-driven decision-making.

EDUCATION

Universitas Islam Negeri Sumatera Utara

Sep 2021 - Jul 2025

- Bachelor of Information Systems | **IPK 3.77 / 4.00**

WORK EXPERIENCE

Badan Pusat Statistik Kabupaten Deli Serdang

Data Analyst | Des 2025 – Present

- Collected and processed statistical data using Python.
- Performed data cleaning and validation for statistical datasets.
- Automated ETL workflows and scheduling using Apache Airflow.
- Managed centralized data storage using Google Cloud Storage (GCS).
- Built data transformation models using dbt.
- Integrated dbt workflows with Airflow using Cosmos.
- Monitored data quality and consistency using Soda Core.
- Created dashboards and statistical reports using Tableau.

Dinas Komunikasi dan Informatika Provinsi Sumatera Utara

Data Engineer intern | Sep 2023 - Des 2023

- Collected Government Public Service data from multiple APIs using Python.
- Built ELT pipelines with Bronze, Silver, and Gold layers in SQL Server.
- Performed data cleaning, transformation, and validation for analytics datasets.
- Designed data models and warehouse schemas using draw.io.
- Managed project workflows and documentation using Notion.
- Created dashboards and reports using Tableau.
- Monitored and maintained stable data pipeline operations.

DATA ENGINEER PROJECT All projects are in the portfolio

Data Streaming Spotify

- Simulates real-time music streaming events from a fake streaming service.
- Streams event data continuously for real-time ingestion.
- Processes streaming data before landing it into the Data Lake every two minutes.
- Stores raw event data in the Data Lake for scalable storage.
- Runs hourly batch jobs to transform raw data into structured tables.
- Applies transformations to create curated datasets for reporting.
- Generates analytics on key metrics like popular songs and active users.
- Provides dashboard-ready data models for business insights.

GCS | Terraform | Docker | Apache Kafka | Spark | Apache Airflow | dbt | Python | SQL | Tableau

Data Pipeline

- Implements an end-to-end data engineering workflow following real industry practices.
- Designs a scalable and robust data architecture for efficient data flow.
- Automates ETL/ELT pipelines for seamless data processing.
- Ensures data quality and reliability using Soda validation checks.
- Manages data warehouse and data marts for structured analytics.
- Applies standardized data transformations aligned with governance principles.
- Optimizes storage and processing for better performance and cost efficiency.
- Delivers clean, trusted datasets for analysts and data scientists.

GCS | Docker | Apache Airflow | Soda | dbt | Cosmos | Astro | Metabase

CERTIFICATIONS

- The Complete dbt (Data Build Tool) Bootcamp – Udemy, 2025
- Analyzing and Visualizing Data with Tableau – Udemy, 2025
- Data Analytics Essentials on AWS – Amazon Web Services (AWS), 2025
- Building Data Lakes and Data Warehouses on AWS – Amazon Web Services (AWS), 2024

SKILLS

- | | |
|-----------------------------------|-------------------------------------|
| • Python | • Docker |
| • SQL (SQL Server, PostgreSQL) | • Terraform |
| • dbt – Data Build Tool | • ETL and ELT |
| • Snowflake – Cloud Data Platform | • Tableau |
| • Apache Airflow | • Data Visualization & Dashboarding |
| • Apache Spark | • Metabase |
| • Apache Kafka | • Microsoft Excel |
| • Google Cloud Storage (GCS) | • Git |
